

Case Study: Prominent Homeowners Association (HOA)

Background:

- **Organization:** A prominent HOA overseeing a large residential community.
- **Industry:** Real Estate & Community Management
- **Number of Residents:** 500+ homes

Overview: The HOA had concerns about unauthorized access to community facilities and potential cyber threats to their resident database and payment systems.

Assessment Process: Grab The Axe's team conducted a comprehensive assessment of the community's physical security measures and digital infrastructure.

Recommendations Implemented:

- Enhanced security at community entry points with biometric systems.
- Recommended upgraded CCTV coverage in public areas.
- Implemented multi-factor authentication for the resident portal.
- Recommendations for enhanced firewall and intrusion detection systems for their digital infrastructure.

Results: The HOA witnessed a significant reduction in unauthorized access incidents and cyber threats, ensuring a safe and secure environment for residents.
